Factors contributing to economic growth include technological advancements, increased capital stock, and human capital development. Sustained economic growth is essential for improving living standards and reducing poverty. The Asian Tigers—South Korea, Taiwan, Hong Kong, and Singapore—provide excellent examples of rapid economic growth driven by export-oriented industrialization.

II Government Intervention: Monetary and Fiscal Policy

Monetary Policy This involves actions taken by a central bank like the Federal Reserve (Fed) in the United States to control the money supply and interest rates. Expansionary monetary policy (lowering interest rates) aims to stimulate economic activity, while contractionary policy (raising rates) aims to curb inflation. The Fed's aggressive quantitative easing program during the 2008 financial crisis exemplifies expansionary monetary policy.

Fiscal Policy This involves government spending and taxation decisions to influence aggregate demand. Expansionary fiscal policy (increased government spending or tax cuts) aims to boost economic activity, while contractionary policy (reduced spending or tax increases) aims to control inflation or reduce the budget deficit. The American Recovery and Reinvestment Act of 2009, a stimulus package in response to the Great Recession, represents a significant example of expansionary fiscal policy.
